

2023-24 Grant Call

Multiple System Atrophy Trust are pleased to announce their 2023-24 Grant call for innovative and novel research projects, both scientific and clinical.

We would be delighted to receive pre-proposals in the following areas:

- Scientific research into MSA, with priority given to:
 - Biomarker studies in MSA
 - Studies of validation or other aspects of prodromal MSA.
- Research focused on improving the clinical care of people living with MSA

Grants of up to £150,000 are available to researchers and up to three projects will be awarded in this grant round.

Pre-proposals

We are holding a pre-proposal stage to support researchers, which should be a short preview of the research you wish to undertake.

The MSA Trust Scientific Advisory Panel will assess the pre-proposals and will contact those who they wish to invite to proceed to full application stage.

The cut-off date for receiving pre-proposals is 8th November 2023 at 5pm GMT.
