

What makes an 'ideal' location/site for placing donation banks?

- ✓ Public sites like **Supermarkets** with council operated parking lots. If spaces already have paper or glass recycling banks, that's even better!

Please keep in mind that Supermarkets already have charities they support, or they tender out their sites to commercial enterprises.

- ✓ Private sites like **Post offices, pubs, Churches, Community Centres, local shopping arcades and Garden Centres.**

Please keep in mind the type of visitors going through these venues. They need to be regular repeat visitors, and who would traditionally recycle their unwanted clothing. E.g. Coach parks are not a good site as they bring mostly tourists. Community Centres on the other hand bring new mothers and senior citizens who would frequently visit the site and be interested in recycling.
